

Terms of Compliance

When a person seeks chiropractic health care and we accept him or her for such care it is essential for both to be working towards the same objective.

Chiropractic has only one goal, it is important that each person understand both the objective and the method that will be used. This will prevent any confusion or disappointment.

An adjustment is the specific application of forces to facilitate the body's correction of vertebral subluxations. Our chiropractic method of correction is by specific adjustments of the spine.

Health is a state of optimum physical mental and social well-being, not merely the absence of infirmity/symptoms.

A vertebral subluxation is a misalignment of one or more of the twenty-four movable vertebrae in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses resulting in a lessening of the body's innate ability to express its maximum health potential.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxations. However, if during the course of a chiropractic spinal examination, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis, or treatment for those findings, we will recommend that you seek the services of a health care provider that specializes in that area.

Regardless of what the disease is called, we do not offer to treat it and will not offer advice regarding treatment prescribed by others. OUR ONLY OBJECTIVE is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct vertebral subluxations.

I, _____ have read and fully understand the above statements.

All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction.

I therefore accept chiropractic care on this basis.
